

Mylyn Project

Users

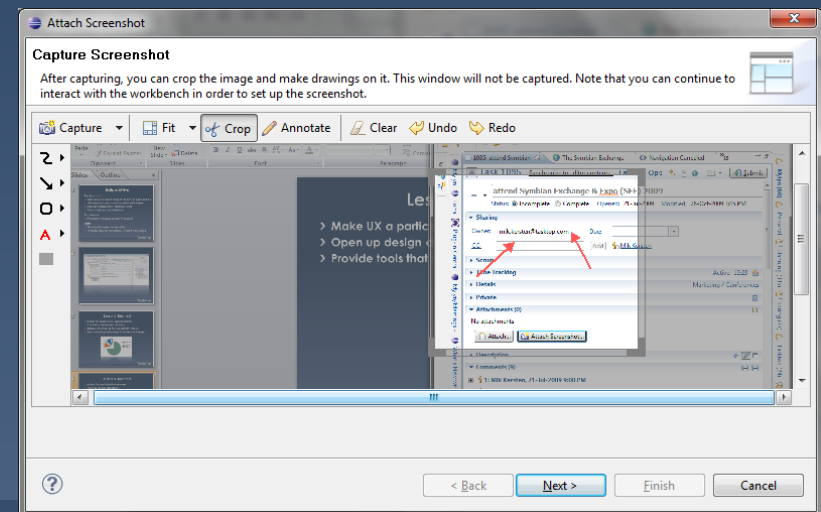

- › Visible in 80% of Eclipse downloads, all but Eclipse classic opted for it
- › Integration: client-side ALM framework and tools
- › Innovation: task-focused interface

Integrators

- › 51 publicly available extensions
- › Many in-house extensions for internal ALM systems

Contributors

- › Over 900 contributions from non-committers
- › 1/7th of all work on Mylyn

“The agile vendors really need to add the links and integrations into the traditional ALM capabilities, like SCM and like change management, and to do that a lot of them are actually taking the exact same course especially in the Java world. They are using the Mylyn project that's part of Eclipse... Mylyn has become as part of this market convergence. ”

Jeffrey Hammond, Forrester

“I feel like I am in Battlestar Galactica when using Mylyn to work inside Eclipse. Task focused user interface is the future and the future is now.”

Mike Henke, ColdFusion Community

Description

When the attributes section is collapsed there is still several pieces of information that it would be helpful to have visible. Chief among these are the product and component. It would be great to see the value of these attributes (only) when the section is collapsed. It would also be nice for other sections to be able to contribute summary information to the section headers in a generic way.

TLP Charter

Task and ALM framework for Eclipse

- › Task management tool for developers
- › Revolutionary task-focused interface
- › Broad ecosystem of Agile and ALM integrations

Mission is to provide

- › Frameworks and APIs for Eclipse-based task and Application Lifecycle Management (ALM)
- › Exemplary tools for task-focused programming within the Eclipse IDE
- › Reference implementations for open source ALM tools used by the Eclipse community and for open ALM standards

Two kinds of projects

- › Frameworks: consumed by integrators, APIs used by the tools projects
- › Tools: consumed by end-users, have own branding and community
