

3.7

# Eclipse Projects Update

eclipse  
**Indigo**

# Simultaneous Release Update

- Helios SR-1 released on September 29
  - EGit/JGit 1.1, Jubula 1.1
  - All other projects provided service releases
- Juno M2 on September 30

# 2011Q3 Proposals (1/2)

- Requirements Modeling Framework (RMF)
  - Clean-room implementation of the OMG ReqIF standard in form of an EMF model and some rudimentary tooling to edit these models.
- Vex
  - Visual Editor for XML that provides WYSIWYM editing ability for XML files

# 2011Q2 Proposals (2/2)

- Aether
  - General-purpose artifact resolution mechanism that can be embedded in any Java program
- Sisu
  - JSR330 container that supports classpath scanning, auto-binding, and dynamic auto-wiring.

# Project Management Infrastructure

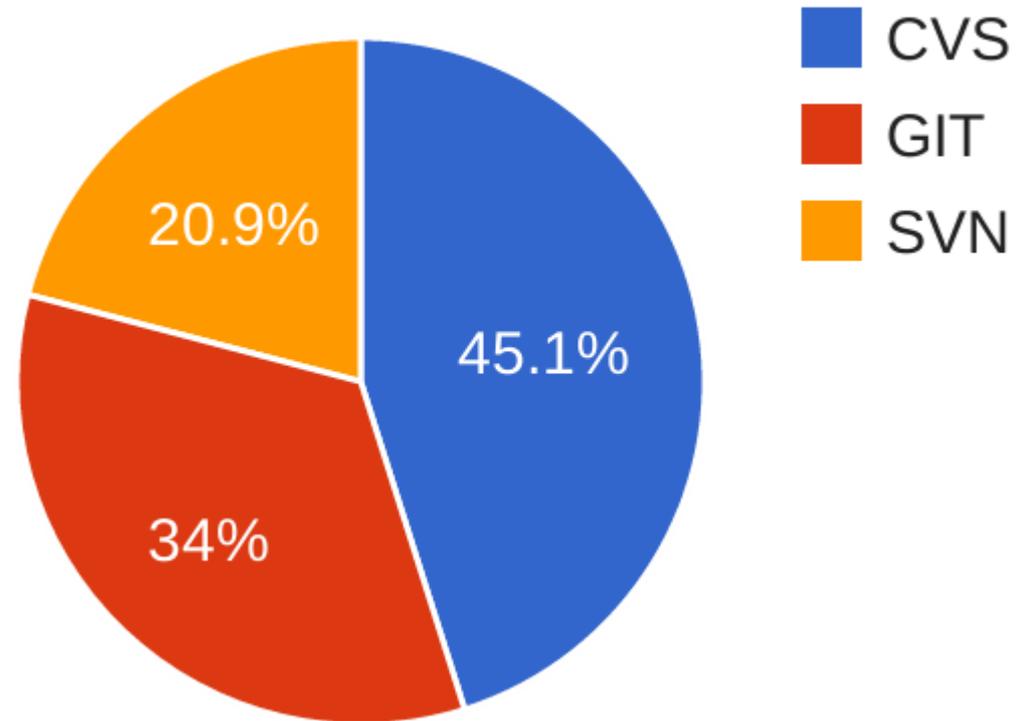

- Replace existing project management infrastructure
  - Developer portal
  - Foundation backend systems
- Better automate key workflows
- Consistency in data storage/user interface
- Drupal 7.x-based implementation
- Consolidate on LDAP for authentication

# CVS Retirement

- Probable date: December 21/2012
  - CVS becomes read-only
  - Comments welcome on Bug 358980
  - Web site migration to start soon
- Recommend projects set migration path to Git
  - SVN to be deprecated soon
  - Retirement date to be determined

# Git Migration

- 79 Projects currently have Git repositories
- More are transitioning
- Need help?
  - Post a bug against Community/Git
