

## About the Foundation

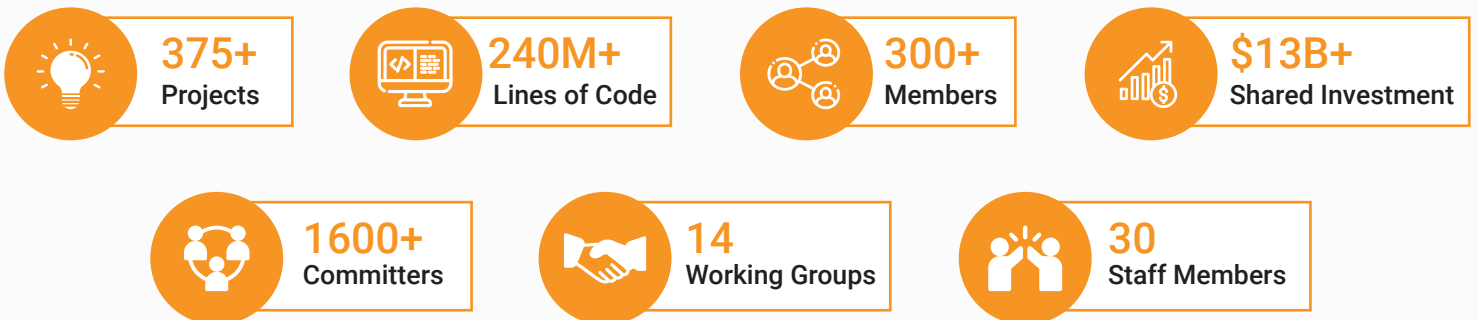

Established in 2004, the Eclipse Foundation is an independent non-profit corporation with operations in Europe, the United States, and Canada. The Foundation provides a global community of individuals and organizations with a mature, scalable, and business-friendly environment for open source software collaboration and innovation. The Foundation is home to the Eclipse IDE, Jakarta EE, and over 375 open source

projects, including runtimes, tools, and frameworks for cloud and edge applications, the Internet of Things, artificial intelligence, automotive, systems engineering, digital ledger technologies, open processor designs, and many others. The Foundation employs a full-time professional staff to provide services to the community and is governed by a board of directors. The Foundation is funded by annual fees and contributions from members.

## Strategic Members

## The Foundation at a Glance

## Strategic Focus Areas

|  |   |   |   |
|--|---|---|---|
|  <h3>Cloud Native Java</h3> <p>We provide a collaborative environment for the world's leading Java ecosystem players to advance open source enterprise Java technologies for the cloud.</p> |  <h3>IoT &amp; Edge</h3> <p>We enable industry leaders to collaborate on an end-to-end IoT architecture that is secure, flexible, and fully based on open source and open standards.</p> |  <h3>Automotive</h3> <p>We provide leading automotive OEMs, their suppliers, and partners with a sustainable, transparent, and vendor-neutral platform to collaborate on open technologies &amp; standards.</p> |  <h3>Tools</h3> <p>The Eclipse IDE is the critical development environment for more than 6 million active users. Our community is innovating on the next generation of cloud native developer tools.</p> |

## Services

### IP Management & Licensing

The Eclipse Foundation is focused on enabling the use of open source technology in commercial software products and services. All Eclipse projects are licensed under the Eclipse Public License (EPL), a commercial friendly, OSI approved license.

### Ecosystem Development & Marketing

The Eclipse Foundation's strategic marketing programs promote Eclipse community engagement, drive awareness and discoverability of Eclipse technologies, and increase the commercial adoption of Eclipse technologies.

### Development – Governance & Processes

The Eclipse community has a well-earned reputation for providing high-quality software, reliably and predictably. The Eclipse Foundation provides services and supports to help projects consistently achieve their goals. Our staff assists new projects in implementing the Eclipse Development Process, a set of open source best practices.

### IT Infrastructure

The Eclipse Foundation provides vendor-neutral, reliable and scalable services for Eclipse technology developers and users. IT infrastructure services delivered to the Eclipse community include source code repositories, build infrastructure, development-oriented mailing lists and newsgroups, a download site, and websites.

## A Proven Governance Framework

With 14 working groups and growing, the Eclipse Foundation provides an open and vendor-neutral governance framework for collaborative development for specific technology domains. The working groups include Jakarta EE, Edge Native, Eclipse IoT, Tangle EE, and more. These groups enable industry collaboration

and coordination across many open source projects and support the shared development of specifications, marketing strategy, test environments, security policies, etc to drive industry adoption. The Foundation actively works to attract and foster new working groups focused on emerging technologies.

## Europe's Largest Open Source Organization

The Eclipse Foundation is the largest open source organization in Europe as measured in staff, projects, developers, and members.

- 170+ member organizations in Europe
- 900+ committers in Europe
- The Eclipse Foundation has operated the Eclipse Foundation Europe GmbH for 7+ years.
- The Foundation is a long-time and respected supporter of and contributor to the European research processes.
