Overview

General Information

This section describes general information about the product.

ID: net.architedfutures.eats.server.product

Version: 4.4.1.qualifier

Name: EATS Server

☒ The product includes native launcher artifacts

Product Definition

This section describes the launching product extension identifier and application.

Product: net.architedfutures.eats.server.product

New...

Application:

The [product configuration](#) is based on: ☐ plug-ins ☒ features

Testing

1. [Synchronize](#) this configuration with the product's defining plug-in.
2. Test the product by launching a runtime instance of it:
 - [Launch an Eclipse application](#)
 - [Launch an Eclipse application in Debug mode](#)

Exporting

Use the [Eclipse Product export wizard](#) to package and export the product defined in this configuration.

To export the product to multiple platforms see the [Cross Platform Wiki Page](#).
