

Examples of IMessageManager treatment of Ampersands

Without escaping the ampersand (single ampersand in the message string) the ampersand appears in the field hover text but disappears from the Form title hover text:

New User-Exit Routine 1 error detected

Name: The User Exit Routine name 'abc&def' should begin with a letter and should comprise of letters, numbers and underscores only.

ID:

Name:

New User-Exit Routine 1 error detected

General Information

ID: The User Exit Routine name 'abc&def' should begin with a letter and should comprise of letters, numbers and underscores only.

Name:

When escaping the ampersand (using a double ampersand in the message string) a single ampersand appears in the Form title hover text as required, but the field hover text just displays the double ampersand:

New User-Exit Routine 1 error detected

Name: The User Exit Routine name 'abc&&def' should begin with a letter and should comprise of letters, numbers and underscores only.

ID:

Name:

New User-Exit Routine 1 error detected

General Information

ID: The User Exit Routine name 'abc&&def' should begin with a letter and should comprise of letters, numbers and underscores only.

Name:
