

My problem is as following, I use prebuilt Eclipse wizard (Axis 1) to build Web service client from provided WSDL:

```
<?xml version="1.0" encoding="UTF-8"?>
<wsdl:definitions targetNamespace="http://xyz.org:8080/jira_adapter"
xmlns="http://www.w3.org/2001/XMLSchema" xmlns:impl="http://xyz.org:8080/
jira_adapter" xmlns:tns1="http://soap.rpc.jira.atlassian.com"
xmlns:wsdl="http://schemas.xmlsoap.org/wsdl/" xmlns:wsdlsoap="http://
schemas.xmlsoap.org/wsdl/soap/" xmlns:xsd="http://www.w3.org/2001/XMLSchema">
  <wsdl:typas>
    <schema targetNamespace="http://soap.rpc.jira.atlassian.com"
xmlns="http://www.w3.org/2001/XMLSchema" xmlns:impl="http://172.16.3.223:8080/
rpc/soap/jirasoapservice-v2" xmlns:tns1="http://soap.rpc.jira.atlassian.com"
xmlns:wsdl="http://schemas.xmlsoap.org/wsdl/" xmlns:wsdlsoap="http://
schemas.xmlsoap.org/wsdl/soap/" xmlns:xsd="http://www.w3.org/2001/
XMLSchema"elementFormDefault="qualified">
      <element name="IssueChangedNotification">
        <complexType>
          <sequence>
            <element name="in0"
type="tns1:RemoteIssue" />
          </sequence>
        </complexType>
      </element>
      <complexType abstract="true" name="AbstractRemoteEntity">
        <sequence>
          <element maxOccurs="1" minOccurs="0" name="id"

        </sequence>
    </complexType>
</schema>
</wsdl:types>

<wsdl:message name="RemoteException">
</wsdl:message>
<wsdl:message name="IssueChangedNotification">
    <wsdl:part name="IssueChangedNotification"
element="tns1:IssueChangedNotification" />
</wsdl:message>
<wsdl:message name="IssueChangedNotificationResponse">
</wsdl:message>
<wsdl:portType name="EAI4JiraSoapService">
    <wsdl:operation name="issueChangedNotification">
        <wsdl:input message="impl:IssueChangedNotification"
name="IssueChangedNotification" />
        <wsdl:output message="impl:IssueChangedNotificationResponse"
name="IssueChangedNotificationResponse" />
        <wsdl:fault message="impl:RemoteException"
name="RemoteException" />
    </wsdl:operation>
</wsdl:portType>
<wsdl:binding name="NewBinding" type="impl:EAI4JiraSoapService">
    <wsdlsoap:binding style="document"
transport="http://schemas.xmlsoap.org/soap/http" />
    <wsdl:operation name="issueChangedNotification">
        <wsdlsoap:operation
soapAction="http://xyz.org:8080/jira_adapter/
issueChangedNotification" />
        <wsdl:input name="IssueChangedNotification">
            <wsdlsoap:body use="literal" />
        </wsdl:input>
        <wsdl:output name="IssueChangedNotificationResponse">
            <wsdlsoap:body use="literal" />
        </wsdl:output>
        <wsdl:fault name="RemoteException">
            <wsdlsoap:fault use="literal" name="RemoteException" />
        </wsdl:fault>
    </wsdl:operation>

```

```

        </wsdl:binding>
        <wsdl:service name="EAI4JiraSoapServiceService">
            <wsdl:port binding="impl:NewBinding" name="EAI4jirasoapservice">
                <wsdlsoap:address location="http://mw7td.xyz.org:8080/
JIRA_ADAPTER" />
            </wsdl:port>
        </wsdl:service>
    </wsdl:definitions>

```

everything seems to work, code is built and I compile it, but in the end my soap request looks as following:

```

<soapenv:Envelope xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
    xmlns:xsd="http://www.w3.org/2001/XMLSchema" xmlns:xsi="http://www.w3.org/
2001/XMLSchema-instance">
    <soapenv:Body>
        <IssueChangedNotification xmlns="http://
soap.rpc.jira.atlassian.com">
            <in0>
                <components />
                <customFieldValues>
                    <customFieldValues>
                        <customfieldId>customfield_10003</
customfieldId>
                        <key></key>
                        <values>
                            <values>2011-12-22 23:54:00.0</values>
                        </values>
                    </customFieldValues>
                    <customFieldValues>
                        <customfieldId>customfield_10160</
customfieldId>
                        <key></key>
                        <values>
                            <values>0.0</values>
                        </values>
                    </customFieldValues>
                    <customFieldValues>
                        <customfieldId>customfield_10070</
customfieldId>
                        <key></key>
                        <values>
                            <values>CZD_DAIRU</values>
                        </values>
                    </customFieldValues>
                    <customFieldValues>
                        <customfieldId>customfield_10132</
customfieldId>
                        <key></key>
                        <values>
                            <values>ewdwd</values>
                        </values>
                    </customFieldValues>
                    <customFieldValues>
                        <customfieldId>customfield_10153</
customfieldId>
                        <key></key>
                        <values>
                            <values>dew</values>
                        </values>
                    </customFieldValues>
                </customFieldValues>
            </in0>
        </IssueChangedNotification>
    </soapenv:Body>
</soapenv:Envelope>

```

```
        <key>TARCHTEST-2317</key>
        <status>10007</status>
        <type>9</type>
    </in0>
</IssueChangedNotification>
</soapenv:Body>
</soapenv:Envelope>
```

and my problem is that I get:

```
<IssueChangedNotification xmlns="http://soap.rpc.jira.atlassian.com">
```

instead of

```
<cc:IssueChangedNotification xmlns:cc="http://soap.rpc.jira.atlassian.com">
```

How to force Axis to create soap message with cc qualified name? My server does not accept my XML and says it is

```
Text:CHARACTER:XML Parsing Errors have occurred
ParserException
```

Really appreciate your help!!!
