# Minutes

## **Approval of minutes from May 12th 2022 meeting**

- Approved
- SXA did raise an issue for second macOS M1 machine

## **Brand Guidelines**

- Sharon requested that we provide a public facing brand guidelines page
- It likely requires a new page on the website
- The question was asked whether we need to logos redesigned now that they've been registered in the US
- ACTION: Sharon to verify which logos will need to be updated by the EF design team

## **OpenJDK Vulnerability Group Discussion (ojvg)(temurin)**

- Tim provided a walk-through of the current release flow as well as the proposed new release flow (to handle releases with patches that remain under embargo until GA)
- Contributors would need to sign an NDA in order to handle those embargo patches
- It was noted that while the EF board had already reviewed the proposal to join the vulnerability group, there is no guarantee that the EF will be elected to join.
- The PMC is proposing that the public CI (ci.adoptopenjdk.net) is made private at build time (no public access) in order to keep the embargoed binaries private)

## **Marketplace Status update**

- IBM, Temurin and Microsoft have provided quotes for press release so far
  - Red Hat will upload after this call
- Deadline to be involved in the press releases quotes is today (Thursday 19th May)
- May 26th is still the press release target date
