| Please Bring/Read:      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Teleconference details: |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Meeting purpose         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

## Agenda

| Item | Time | Agenda Item | Presenter |
|------|------|-------------|-----------|
| 1    |      |             |           |
| 2    |      |             |           |
| 3    |      |             |           |
| 4    |      |             |           |

## Open Actions

| No | Action/Discussion                                                           | Who | When | Status or comment |
|----|-----------------------------------------------------------------------------|-----|------|-------------------|
| 1. | WP3 - CDT                                                                   |     |      |                   |
| 2. | Introduction of Slides by MR. Sommerlad                                     |     |      |                   |
| 3. | Send slides of Mr. Sommerlad                                                |     |      |                   |
| 4. | Continental+Bosch: Interested in an API for memory mappin                   |     |      |                   |
|    | Garro: Further cooperation could be beneficial on improving the overall CDT |     |      |                   |
|    |                                                                             |     |      |                   |

|  |                                                                                                               |  |  |  |
|--|---------------------------------------------------------------------------------------------------------------|--|--|--|
|  | WP 4 - Safety                                                                                                 |  |  |  |
|  | Bosch: ALM Activites, ASpice requirements                                                                     |  |  |  |
|  | Mario: NSafe, VTest, MBAT                                                                                     |  |  |  |
|  | Oscar: Tool Qualification can be a good user of those tools to show that it is much easier to use these tools |  |  |  |
|  | Ignacio: ALM system covers requirements to test, development processes are dependent on business unit.        |  |  |  |
|  | Garro: OSLC might be a point in setting up a traceable tool chain                                             |  |  |  |
|  | Bosch: OSLC for change management system                                                                      |  |  |  |

## Closed Actions

| No | Action                                                                                  | Who              | When | Status or comment |
|----|-----------------------------------------------------------------------------------------|------------------|------|-------------------|
|    | TODO: Schedule meeting for exchange on OSLC.                                            |                  |      |                   |
|    | Harald Mackamul: OSLC in Amalthea                                                       |                  |      |                   |
|    |                                                                                         |                  |      |                   |
|    |                                                                                         |                  |      |                   |
|    | WP6 Build System                                                                        |                  |      |                   |
|    | Bosch + Conti: Introduction of WP 6 suggestions                                         |                  |      |                   |
|    | BMW: Could be attractive                                                                |                  |      |                   |
|    | Clarify inception of a new work package, ask for new members                            | Graf             |      |                   |
|    |                                                                                         |                  |      |                   |
|    | WP 1 - Platform                                                                         |                  |      |                   |
|    | Will invite for an invitation on Lifecycle                                              | Geyer-Blaumeiser |      |                   |
|    | Garro: Is there need for maintaining 3.x versions?                                      |                  |      |                   |
|    | Lars: Artop supports last two versions, should be a feasible strategy for this platform |                  |      |                   |
|    | Lars: Coordinate with Polarsys and LTS                                                  |                  |      |                   |
|    |                                                                                         |                  |      |                   |
|    | Brainstorming on the Resources for the IWG                                              |                  |      |                   |
|    | Garro: Forming a legal entity would be an organizational problem                        |                  |      |                   |
|    | Hammel: Buzzword: Tool Standardisation going on                                         |                  |      |                   |
|    | Garro: Do we have a success story. WP1 could be a success story for Continental?        |                  |      |                   |
|    | Garro & Noack: We need to have a roadmap / milestone plan.                              |                  |      |                   |

|  |                                                                                                                                                                                                                                                                                                                       |     |  |  |
|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|--|--|
|  | All workpackages, define a vision and a milestone plan, think about the effort.                                                                                                                                                                                                                                       | All |  |  |
|  | Low Prio for WP 4, WP leadership on large models to itemis                                                                                                                                                                                                                                                            | AGR |  |  |
|  |                                                                                                                                                                                                                                                                                                                       |     |  |  |
