Software Quality Days

The conference for software quality enthusiasts!

**15-17/01/2013
VIENNA
Make it a date!**

Software Quality Days is one of the biggest conferences on software quality. This makes it a must for anyone interested in software quality and testing.

With its **keynote, practical and scientific presentations, as well as specialist exhibitions and tutorials etc.**, this specialist symposium offers a wealth of valuable opportunities in terms of **professional software development, working on new ideas and networking** in this area.

The excellent quality of the presentations and tutorials and a **combination of the latest scientific topics with high-quality project reports** taken directly from practice make this the **TOP software quality event!**
