

Eclipse IoT Testbeds

Benjamin Cabé

Eclipse IoT WG Meeting – Feb 1, 2017

- > Focus on an industry solution
- > Showcase a technical solution + vendor ecosystem

Examples:

Waste management

Asset tracking

Smart manufacturing

Create and host testbeds
that will
showcase Eclipse IoT projects
as well as our
member companies' offers for IoT

Requirements to participate in testbeds

- Target an **industry solution**
- Participants are **member of the Eclipse IoT Working Group**
- Minimum of **3 WG members involved**
- Minimum of **2 Eclipse IoT projects**

How to start a testbed at Eclipse IoT?

- Proposal
 - Short **description** of the scenario
 - High-level **architecture**
 - Identified **extension points**
 - List of **interested members**
 - List of **applicable Eclipse IoT projects**
- Review

Completed testbed?

- Executive Summary
- Blueprint / Architecture Diagram
- Documentation (API)
- Demo kit (ex. for tradeshow)
- Demo system running 24/7 at Eclipse
- Webinars / Short videos
- White Paper
- etc.

Promotion of the testbeds

- Tradeshows
- Fact sheets
- Webinars
- Demo system running 24/7
- Tutorial/Workshops
- etc.

Feb 1st Presentation of the **strategy** to IoT WG members

mid-Feb **Use case** for the first testbed is **agreed upon**

Feb-Apr **Develop** testbed

May 2-4 **Announce** the first Eclipse IoT test bed at Red Hat Summit 2017 (Press release + demo pod)

May 16-18 Demo pod at **IoT World 2017**

- Document the demo available today + API
- Setup collaboration channels (weekly(?) calls, Github, mailing list, ...)
- Recruit at least 2 new members
- Create collateral:
 - New section on iot.eclipse.org
 - Architecture diagram, slide deck, ...
- Setup a live demo

Questions?
