Azul Systems

**The industry's only company exclusively focused on
Java and the Java Virtual Machine (JVM)**

- ✓ 12+ year history
- ✓ Global customer base
- ✓ Member of the JCP Executive Committee

Introducing Zulu & Zulu Embedded

Zulu: Certified OpenJDK™

- Binary builds reflecting the latest advances in OpenJDK™
- Free and 100% Open Source
- Compliant and compatible with Java SE versions 6, 7, and 8, verified using the OpenJDK Community Technology Compatibility Kit (TCK)
- Drop-in replacement for incumbent JVM
- Economical tech support via Zulu Enterprise offering
- 10-year support lifetime per Java major level
- Optional rapid access to bug fixes, Application Guard, Technical Account Managers (Zulu Enterprise Premium offering)

Zulu Supported Platforms

- Linux:
 - RHEL 7.x, 6.x and 5.2 or later
 - SLES 12 11 sp1, sp2 and sp3
 - CentOS 7.x, 6.x and 5.2 or later
 - Ubuntu 10.04 LTS and 12.04 LTS
 - Debian Wheezy, Jessie
 - Oracle Linux 7.0 or later, 6.6 or later
- Windows Server: 2008 R2, 2012 and 2012 R2
- Windows Desktop: 7, 8, and 8.1
- Mac OS X: 10.9, 10.10
- Hypervisors: VMware, Hyper-V, KVM
- Cloud: Microsoft Azure, Docker, Amazon AWS
- JDK Version: Java SE 6, 7, and 8
- Hardware: Intel/AMD x64

Zulu Embedded – Why?

Licensing too expensive

Redistribution licenses too restrictive?

Standard builds don't fit & no Shovel-ware

Grow Java Community for IoT

9+
Million

Zulu Embedded

Java for the Internet of Things

High-Function Devices That Require

- ✓ Open source
- ✓ Robust Java SE implementations
- ✓ Customizable footprint
- ✓ Easy redistribution

Zulu Embedded

- Based on 100% OpenSource Zulu (certified build of OpenJDK)
- Customizable
 - Intel/AMD x86, ARM32 on roadmap
 - 32- or 64-bit
 - Linux, Windows, Mac OS X or specialized embedded operating systems
 - Headful, headless, compact profile or custom
 - Custom packaging or standard types such as ZIP, MSI and DEB
 - Java SE 6, 7 and 8; Java SE 9 when available.
- Over 2 million devices in the field already
