

Eclipse Foundation Technology Compatibility Kit License - v 1.0

Copyright (c) 2018, Eclipse Foundation, Inc. and its licensors.

Redistribution and use in binary form without modification is permitted provided that the following conditions are met:

1. Use of the Technology Compatibility Kit accompanying this license (TCK) is permitted solely for the purpose of testing compatibility of an implementation (the “Product”) of a specification (the “Specification”) made available by the Eclipse Foundation, Inc. (“Eclipse”).
2. A Product will be deemed to be “compatible” with the Specification if it fully and completely meets and satisfies all requirements of the TCK.
3. Before any claim of compatibility is made, the testing party must:
 - a. use the TCK to demonstrate that the Product fully and completely meets and satisfies all requirements of the TCK; and
 - b. make all TCK test results showing full and complete satisfaction of all requirements of the TCK publicly available on the testing party’s website and send a link to such test results to Eclipse at tck@eclipse.org.
4. The test results must be continuously available and the link must be live for at least as long as the Product is available in the marketplace.
5. Claims of partial compatibility are strictly prohibited. Only Products which fully meet and satisfy all requirements of the TCK may be identified as compatible or in any way satisfying the TCK. No subsetting or supersetting of the Specification is permitted by any Product claimed to be compatible with the Specification. Compatibility can only be expressed by a true factual statement communicating full compatibility. A determination that a Product is compatible with the TCK does not, in itself, give rise to the right to use any name, mark, logo associated with the TCK, Eclipse, or Eclipse’s contributors or licensors.
6. Upon the request of Eclipse, a tester will retract any statements of compatibility which Eclipse determines to be false or misleading.
7. Redistribution of the TCK must be under this Eclipse Foundation Technology Compatibility Kit License and must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.
8. Neither the name, trademarks or logos of Eclipse, nor the names, trademarks or logos of its contributors or licensors may be used to endorse or promote products tested with this software without specific prior written permission.
9. The source code for the TCK accompanying this license is available from Eclipse.
