MDM@WEB 5.0 is life

openMDM[®] status vs. architecture

Standardized generic Persistence layer

Basic functions
 - Multiple database connect
 - Navigation
 - Search
 - Download

Compatibility
 - MDM 4 database

Functions
 - Import
 - Administration
 - Template handling

Business object model

API

ASAM ODS Applikationsmodell

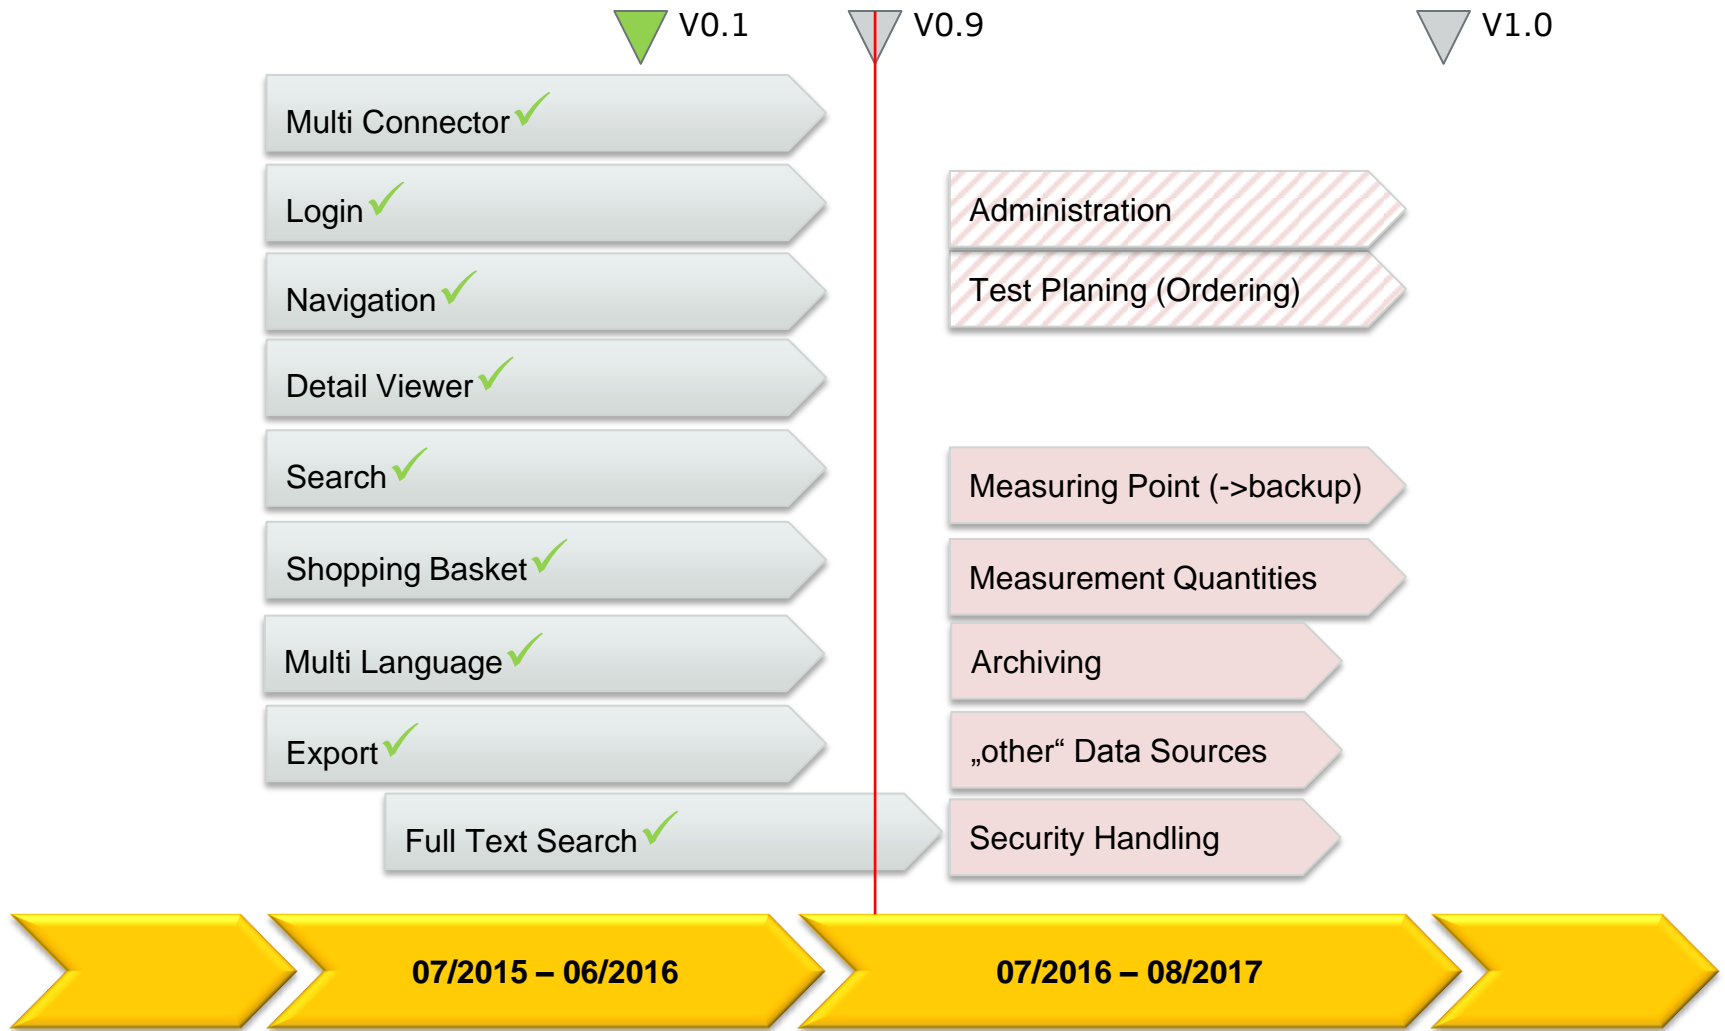

Big data readiness

Collaboration readiness (modularization, QA)

openMDM® EWG time line

openMDM[®] operational issues

Use of Jira:

- All EWG members should be addressable within the Jira instances of the EWG
 - Create your account at <https://openmdm.atlassian.net/admin/users/sign-up>
 - Request authorization from jira@openmdm.atlassian.net

openMDM[®] operational issues

Use of Jira:

- Involve yourself to the EWG's topics

The screenshot shows a Jira dashboard for the 'openMDM(R) EWG service and result packages' project. The dashboard includes a sidebar with navigation links and a main content area with two sections: 'Two Dimensional Filter Statistics' and 'Filter Results'.

Two Dimensional Filter Statistics: openMDM(R) EWG deliverables

Issue Type	OPEN	IN PROGRESS	BACKLOG	READY FOR REVIEW	ASSIGNED	REJECTED	T:
<input checked="" type="checkbox"/> Result Package	9	1	0	1	3	1	15
<input checked="" type="checkbox"/> Service Package	2	2	2	0	7	1	14
Total Unique Issues:	11	3	2	1	10	2	29

Grouped by: Status Showing 2 of 2 statistics.

Filter Results: openMDM(R) EWG deliverables

Key	Summary	Labels
ORGA-139	Connecting PAK Cloud to openMDM5 / "other adapter"	BMW Result_2016_2017
ORGA-138	openMDM 5 Full Text Search port of Lucene to ElasticSearch	BMW Result_2016_2017
ORGA-134	MDF4 ASAM ODS header extractor	ASAM ATFX Audi MDF MDF4 Result_2016_2017
ORGA-133	MDF4 data sorter	ASAM Audi MDF MDF4 Result_2016_2017
ORGA-132	Export of MDM5 channels to Simulation tools	Daimler Result_2016_2017
ORGA-131	Import of Test.Lab data to MDM5 database	Daimler Result_2016_2017
ORGA-99	Graphical measurement point editor	Piterion Result_2015_2016
ORGA-98	Security and Access Control Concept for openMDM	MBBM Result_2015_2016 SCMeeting010_20160607 SC_HISTORY Siemens

openMDM[®] operational issues

Use of Jira:

- Use the meeting management features in the EWG's Jira
- put issues on the agenda of EWG gremia by editing the committee field

A screenshot of the Jira "Edit issue" form for issue ORGA-118. The form includes fields for "Attachment", "Labels", "Original Estimate", "Remaining Estimate", "Committee", and "Epic Link". The "Committee" dropdown menu is open, showing options: "None", "SC", "AC", "QC", and "MDM|BL". A red circle highlights the "Committee" dropdown menu. At the bottom right, there are "Update" and "Cancel" buttons.

Edit issue : ORGA-118 Configure Fields

Attachment Drop files to attach, or browse.

Labels Begin typing to find and create labels or press down to select a suggested label.

Original Estimate (eg. 3w 4d 12h) The original estimate of how much work is involved in resolving this issue.

Remaining Estimate (eg. 3w 4d 12h) An estimate of how much work remains until this issue will be resolved.

Committee None, SC, AC, QC, MDM|BL

Epic Link Choose an epic to assign this issue to.

Comment Style, B, I, U, A, %A, link, unlink, list, list, emoji, +

Update Cancel

openMDM[®] operational issues

Top Level Requirements (Goals) Management

The steering committee decided to maintain a set of top level requirements, from which further actions or decisions can be derived. It should be visible to the public and thus serve for a vivid and transparent discussion – followed by a stringent focus on the common goals of the EWG. For that reason, the charter was transformed into a set of goals (as Jira tickets qualified by the issue type „top level requirement“).

This way, requests for strategic orientation and/or focus can be placed by the community members and validated by the steering committee. They serve furthermore to keep track of the strategic decisions of the community and to initiate and drive by the SC strategic changes if needed.

The screenshot shows a Jira dashboard for 'openMDM(R) top level requirements'. It includes a sidebar with navigation links and a main content area with a 2D filter statistics table and a list of issues.

Assignee	OPEN	VALID	T.
Unassigned	5	9	14
Total Unique Issues:	5	9	14

Key	Summary	Status
ORGA-130	Development of the openMDM(R) 5 toolkit.	OPEN
ORGA-118	Support open solutions	OPEN
ORGA-117	Support global standardization	OPEN
ORGA-116	Support local (with respect to user companies) standardization	OPEN
ORGA-115	Support distributed data storage	OPEN
ORGA-114	Support the monitoring and control of resources	VALID

substantial improvement:

WG Manager [ORGA-72](#)

the working group manager is necessary, because we need:

- meeting management of all committees (SC, AC, QC)
- preparing steering committee topics (presentations, decision memos etc.)
- EWG charter monitoring
- EWG membership and membership fees tracking
- on time fixing/agreement and on time delivery of membership fees service packages
- keep track of the membership status contacts, responsibilities
- annual meeting preparation
- coordination of marketing activities
- new member push up
-

Now: open MDM WG Fees

WG Member Fees

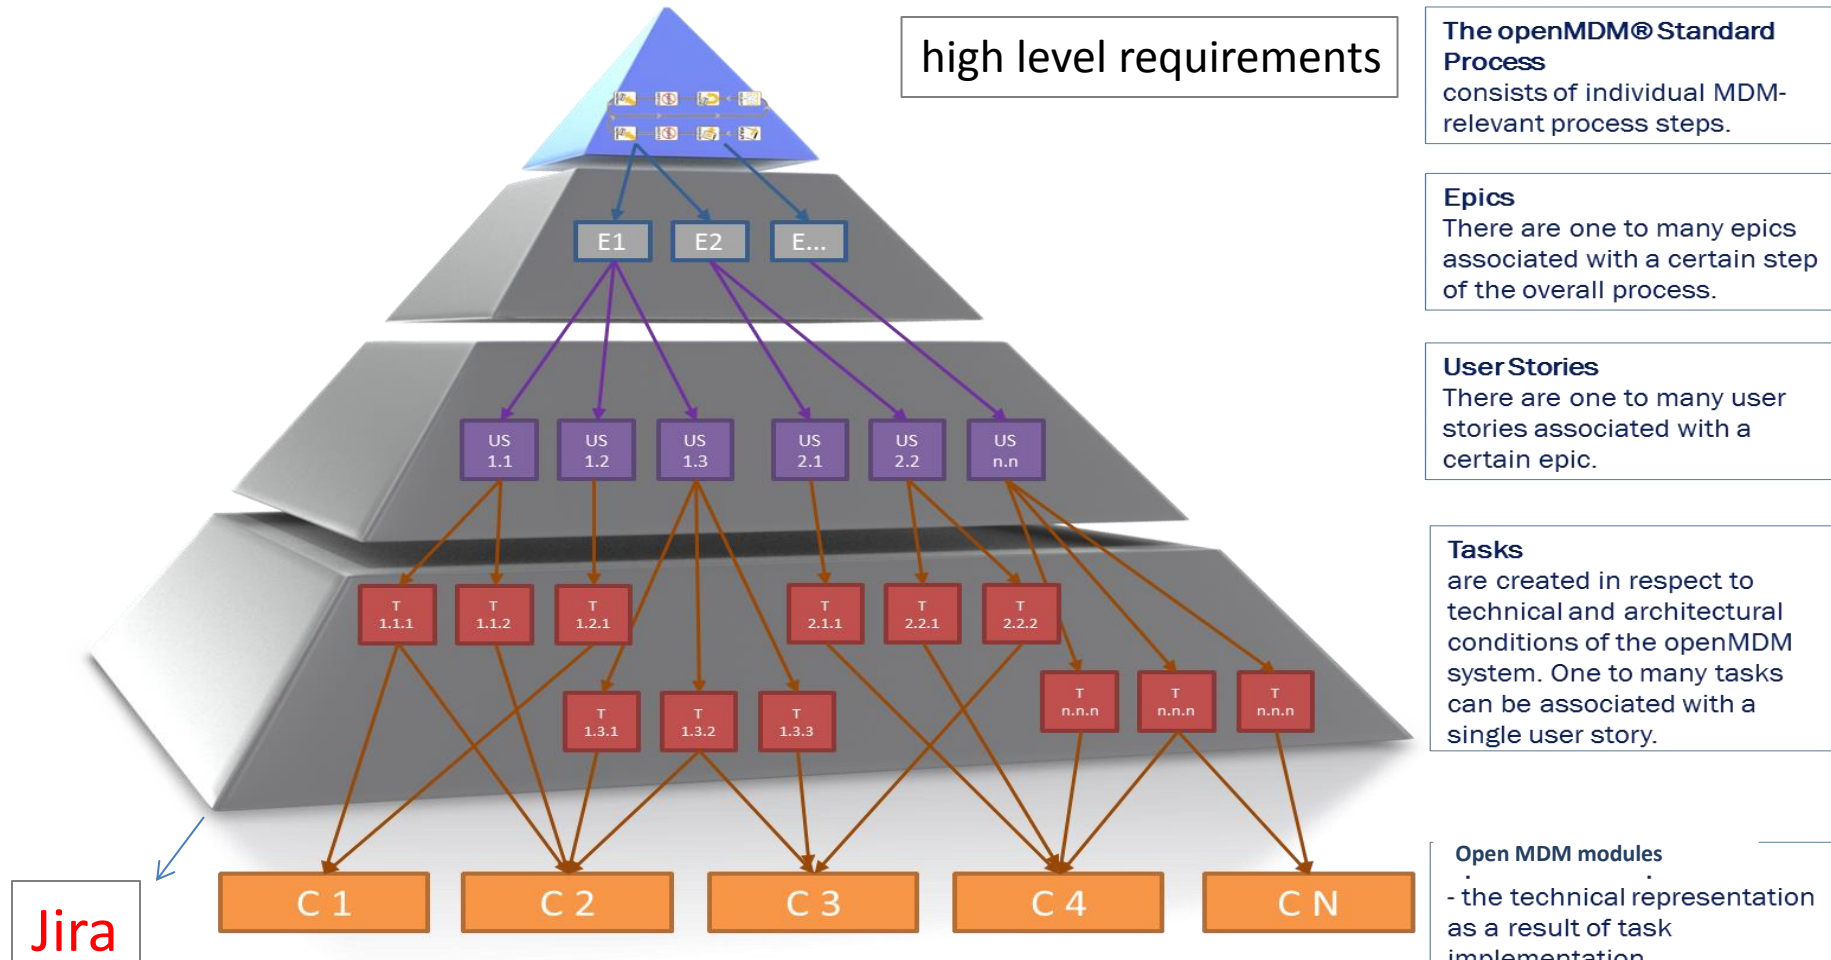

The following table lists the annual Eclipse Foundation membership fees and the openMDM working group fees payable to the Eclipse Foundation Inc.

Turnover	Eclipse Solution Membership	WG Fees Driver Member	WG Fees User Member	Other
>\$250 million	\$20,000	\$ 40,000	\$6700	\$0
>\$100 million <= \$250 million	\$15,000	\$ 40,000	\$6700	\$0
>\$50 million <= \$100 million	\$10,000	\$ 40,000	\$6700	\$0
>\$10 million <= \$50 million	\$7,500	\$ 40,000	\$6700	\$0
<\$10 million	\$5,000	\$ 40,000	\$6700	\$0
<\$1 million & < 10 employees	\$1,500	\$ 40,000	\$6700	\$0

Application Vendor members and Service Provider are required to provide 10 manpower units of participation services to the WG per year.

Summary of the plan 2017 Daimler

DAIMLER

Realize the 9 epics for use

(# = epic)

#1: add necessary moduls to MDM | Components to transforme the open MDM4[®] ODS-selection Test.Lab to open MDM5[®] by Siemens

#2: add necessary moduls to MDM | Components for analog to #1 with PAK by Müller BBM

#3: add necessary modules to MDM | Components for data viewing like open MDM4[®] x/y and quick audio

...

to do: identify moduls wich we need by detail planning epic #1-#9 with the Daimler teams matching with Jira.

Statements from Daimler

DAIMLER

open MDM is now established by the management as a tool to realize industrie 4.0 by using the eclipse open source work bench (open MDM[®], openPASS, more ...)

the Daimler user now want to feed open MDM[®] with there epics

Plan for developing goals:

- 1) find data ->
- 2) standardisation of data ->
- 3) process data->
- 4) automate data processing (Big Data)

Eclipse working group open MDM[®] 5 and Industrie 4.0 - goals

DAIMLER

networking Automobile Industrie world wide

networking internal Daimler

high speed software developing

cost sharing with OEMs and internal

creating new standards

the 4.0 future
we can!

more service provider

developing the next genation

openMDM
Measured Data Magement

Requirements from BMW 2016

Epic: Data Source

UserStories:

- User wants to navigate and view in NVH result data in the same way as in ODS data sources
- Data access must be controlled
- Direct access to result data from native application
- User wants a full text search functionality

Tasks:

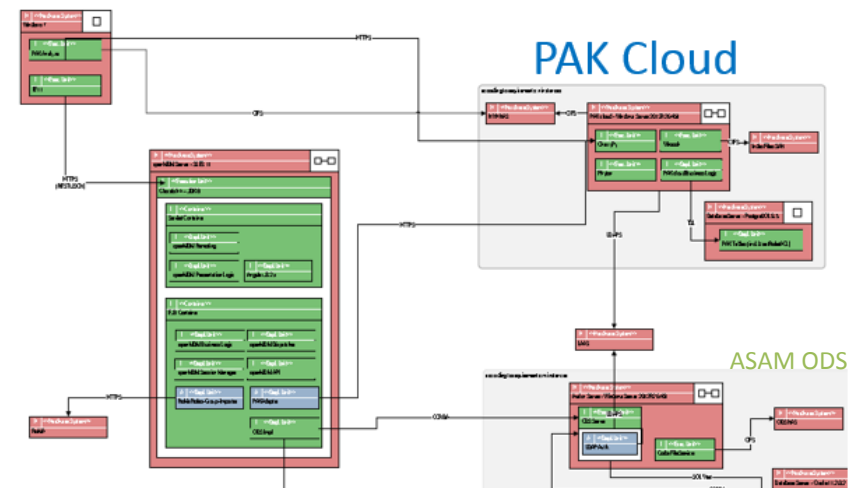

- Readiness of: openMDM API, security API, PAK Cloud API
- Architectural concept, coordinated with AC

Modules:

- NVH adapter („other adapter“ see architecture 5.0)
- FullTextSearch based on ElasticSearch

Dependencies:

- openMDM API
- PAK Cloud API (prop. API)
- Security (role / rights)

Vision from BMW 2016ff

V1: Readiness of MDM@Web 1.0 for productive use

- Integration security (role/right)
- Usability, missing functionality/moduls, ...

V2: Readiness of MDM@Web 1.x for NVH environment

- Integration major NVH applications

V3: PLM (Product-Lifecycle-Management)

- openMDM is the backbone of the result data storage in the PLM
- openMDM support different data storage („big data“)

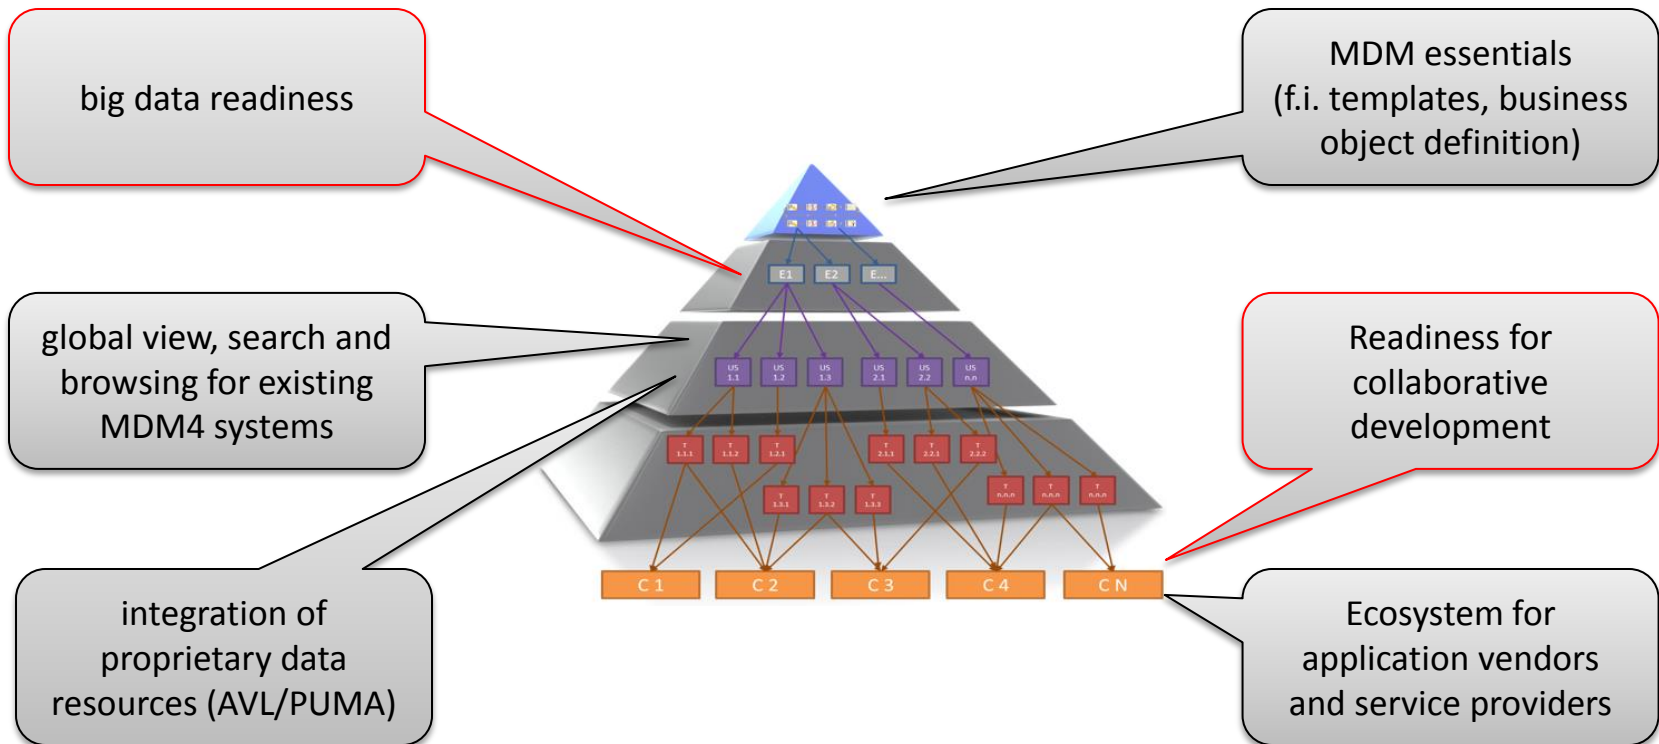

V4: Readiness openMDM for ASAM ODS 6.x

07/2015 – 06/2016

07/2016 – 06/2017

V1, V2, V3, V4

openMDM® EWG related goals and focus 2016/17

openMDM® EWG related goals and focus 2016/17

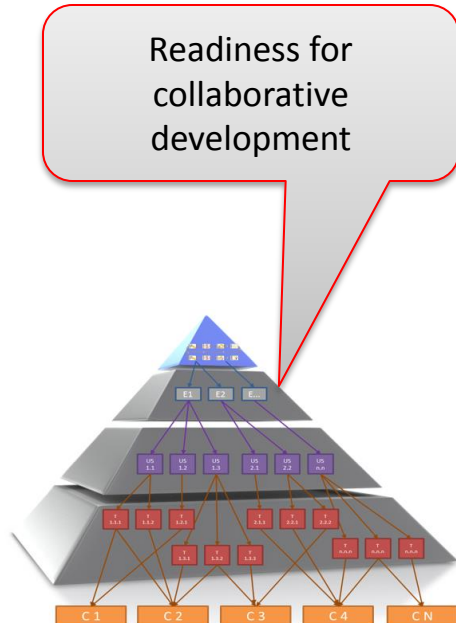

- Seamlessly distributed data storage
- Multi site configuration
- Storage and processing resources affinity
- Fast analytics and processing
- Take full advantage of existing technology

BUT

- Keep openMDM® domain specific features
 - Reuse of test results
 - Process coverage
 - Reuse of tools (applications, components)
 - Ecosystem of vendors

openMDM® EWG related goals and focus 2016/17

- Toolkit focused development
- Continuous architecture development
- Multilevel requirement's management
- Multilevel release management
- Quality assurance

To ensure

- Independent work on well defined work packages
- Efficient worksplit
- Reduced effort in decisions
- Full transparency on recent decision status

Requirements from Siemens and Müller-BBM

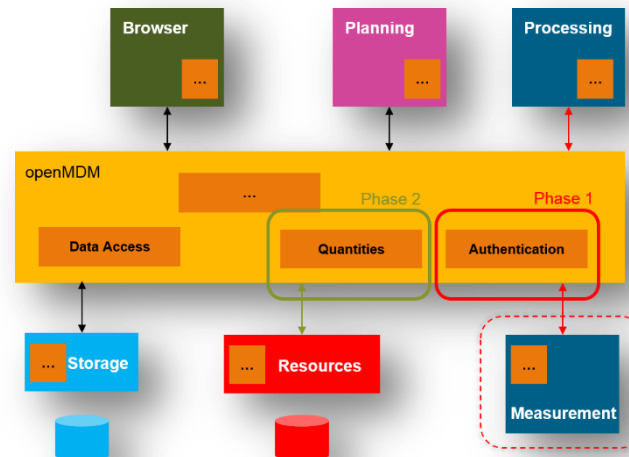

openMDM 5

Agreement/Decision on specifications for:

#1: Authentication → Roles and Rights

#2: Physical Quantities / Units

openMDM[®] Eclipse Working Group

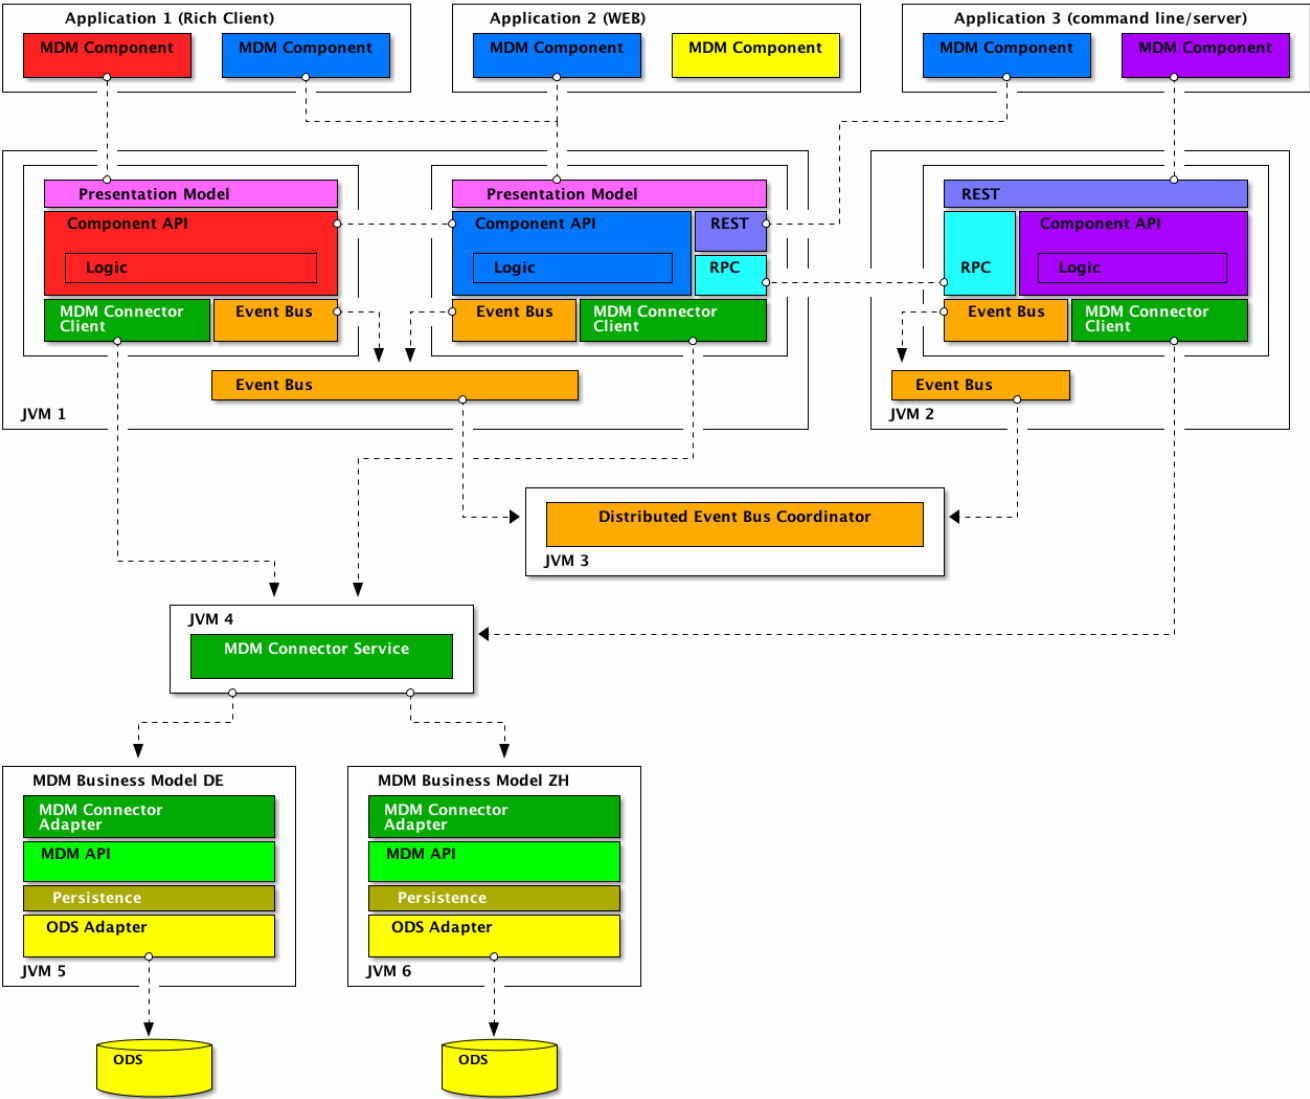

General Assembly

Architecture Committee Report

Stuttgart, July 18th, 2016

Andreas Benzing, Canoo

Starting Point: Architecture

Activities Overview

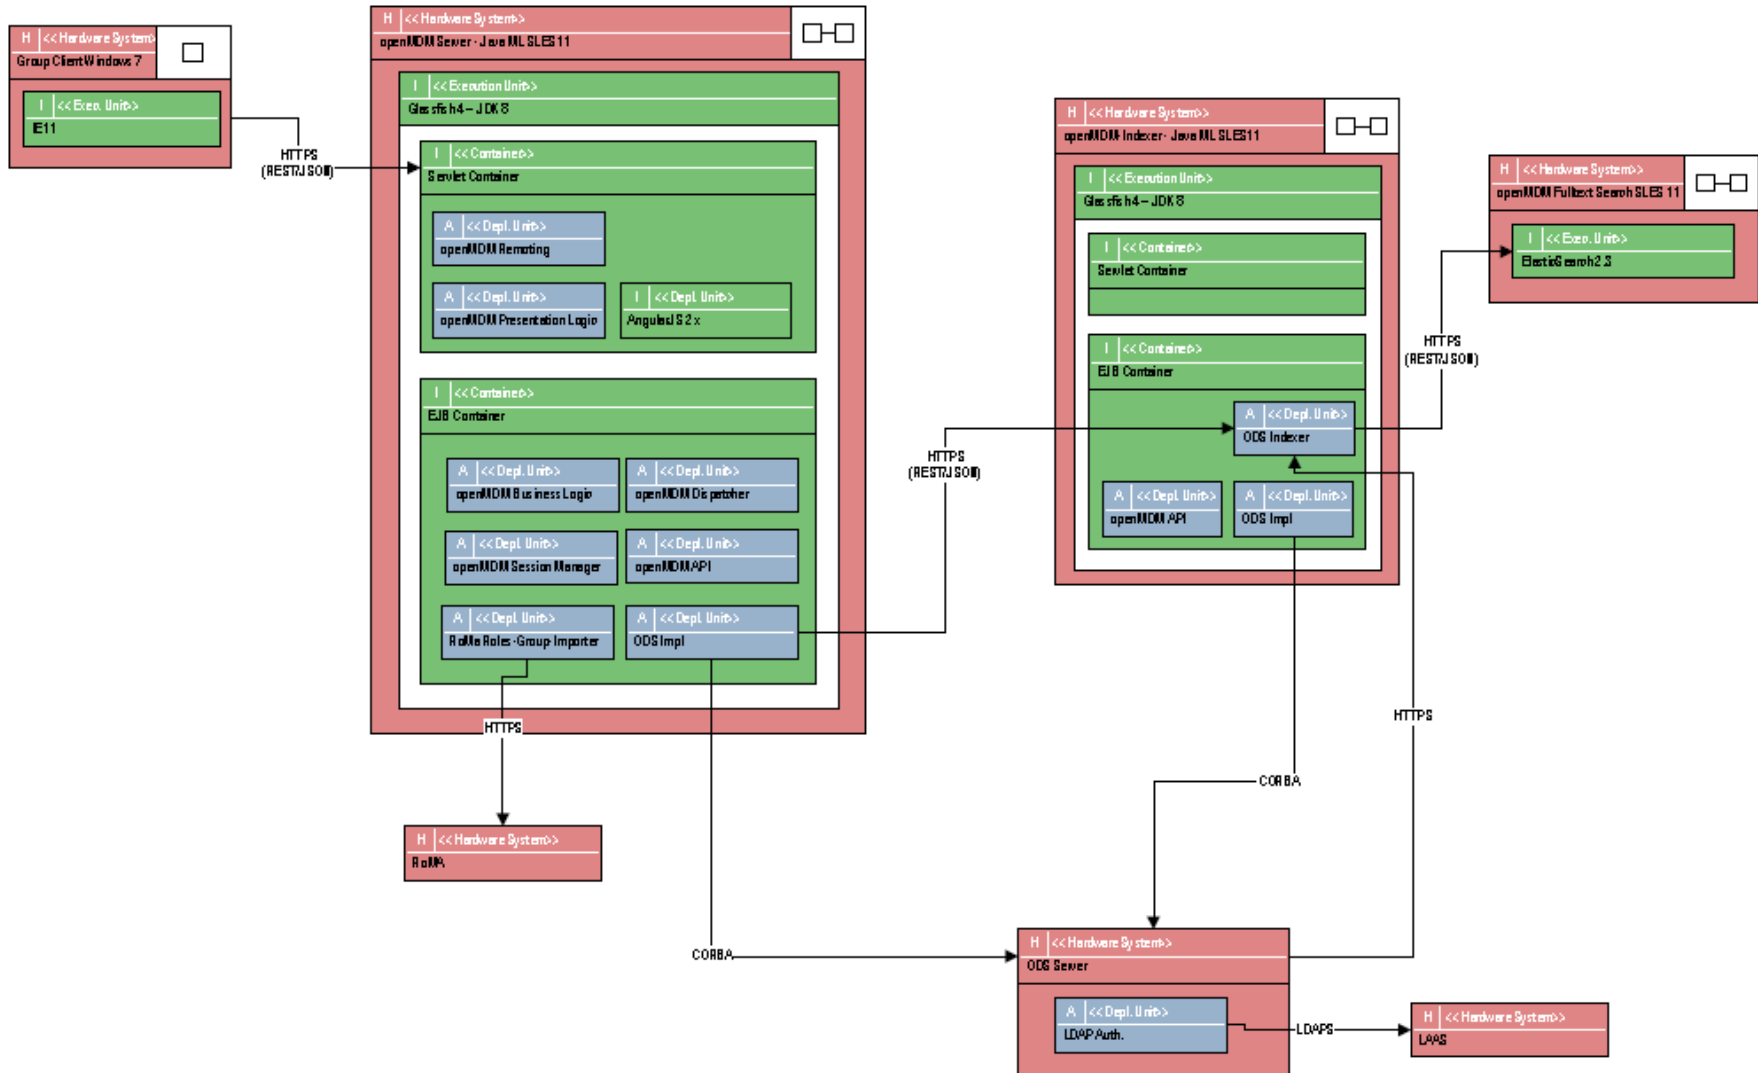

- 12 conference calls / 1 meeting + call
 - Protocols published in Wiki:
[https://wiki.eclipse.org/Open-Measured-Data-Management-WG/Architecture Committee#Meeting Minutes](https://wiki.eclipse.org/Open-Measured-Data-Management-WG/Architecture_Committee#Meeting_Minutes)
- Approved architecture specification
- Gathered technology input
- Established proposal process
 - Created proposal guidelines:
[https://wiki.eclipse.org/Open-Measured-Data-Management-WG/Architecture Committee#Technology Proposal Guidelines](https://wiki.eclipse.org/Open-Measured-Data-Management-WG/Architecture_Committee#Technology_Proposal_Guidelines)
 - 8 proposals discussed so far

Proposals

- MDM5API technology proposal (ORGA-59)
 - Refactored to individual topics
- Using an Adapter design for MDM API (ORGA-61)
 - Already considered in architecture
- Definition of test frameworks (ORGA-64)
 - In favor of SonarQube
- Full-text search technology and architecture
 - In favor of ElasticSearch over Solr (ORGA-102)
 - Search uses the openMDM API (ORGA-103)
- Angular2 + Bootstrap (ORGA-100)
- Typescript (ORGA-101)

Implementation Proposal by BMW

Recent Topics

- Discussion about repositories and collaboration
 - Technical environment to support collaborative development -> **Git based workflow**
 - Dependency handling to enable automated build and include proprietary code -> **Release artifacts!**
- Discussion of the difference between components in openMDM 4 vs. 5
 - Renaming to **openMDM 5 Modules** for clarity

Upcoming Topics

- Consolidate AC documentation (ORGA-74)
 - Individual protocols must be integrated in architecture documentation
 - Gather all related information in one place
 - Approved by SC, to be assigned
- Architecture conformity check
 - Review of the code to verify its alignment with the specified architecture

openMDM[®] Eclipse Working Group

General Assembly

Quality Committee Report

Stuttgart, July 18th, 2016

Michael Schwarzbach, BMW

Status Quality Services

Integration environment / End-to-end test environment:

- Done:
 - PoC outside eclipse environment
- Work in progress:
 - Avalon ODS server in virtual server environment
- Open points pending commissioning by SC:
 - Integration in eclipse environment

Continuous integration/development:

- Pending commissioning by SC
