## 1. Release review V1.0

The obsoleted GUI parts in the current version will be removed for release v1.0. However, for documentation purposes they will still be part in a prior minor release. VW and Mercedes will align on this topic.

There will be only one release review for the repository opSimulation with references to the other repositories. Internal dependencies will be enabled as review-ready. Accordingly, the readme file will contain references to those dependencies.

In the next AC meeting the starting date for the release review will be discussed.

## 2. Call for Talks EclipseCON 23

Jan is going to brainstorm about some ideas to present at the EclipseCON 23. The topic will be discussed in the next SC meeting.

## 3. EclipsePEDIA will be deprecated

See <https://gitlab.eclipse.org/eclipsefdn/helpdesk/-/wikis/Wiki-shutdown-plan> for more details.

New location to host the meeting minutes can be Google Drive. Further discussion in the next SC meeting.

## 4. Project websites domain will change

Eclipse project websites are going to move to eclipse.dev. Specifically, this entails:

- All project websites of form eclipse.org/projectname will be moved to <https://eclipse.dev/projectname>
- A permanent, indefinite redirect from eclipse.org/projectname will be created. This will ensure that eclipse.org/projectname/somepage will still work.

The timeframe to implement this is approximately 60 days (see: <https://gitlab.eclipse.org/eclipsefdn/helpdesk/-/issues/3069> ).

This will effect:

<https://projects.eclipse.org/projects/automotive.openpass>

Will be not effected:

- Webpage: <https://openpass.eclipse.org>
- GitLab: <https://gitlab.eclipse.org/eclipse/openpass>
- CI: <https://ci.eclipse.org/openpass/>
