OpenPASS Program Objectives 2024

1. **Further technical enhancements of openPASS simulator**
   - Focus topics: CI, E2E test framework pyOpenPASS and documentation
   - Improved support of current versions of ASAM OpenSCENARIO, OpenDRIVE, OSI as well as Modelica FMI, SSP
   - Dependency management and compatibility of the different openPASS repositories

2. **Setup of GUI**
   - CI for GUI
   - Functional GUI to configure, run and evaluate experiments

3. **Enhance Usability and lower entry hurdle**
   - Creation of tutorials/demos (using GUI, using configs, including FMI/OSI) and include them onto the webpage
   - Webpage improvements (clear structure, content)

4. **Identify collaboration opportunities**
   - List links to projects on website, links to ASAM & other relevant open source projects
   - Stay in sync with Eclipse working group consolidation (openMobility, SDV, etc.)

5. **Improvement of quality / cooperation model**
   - Increase responsiveness on issues, information on known build issues
   - Road map for openPASS (e. g. 3 year plan)
