Program Objectives 2023

1. **Release simopenpass V1.0**
   - Re-structured modular architecture with MantleAPI & Engines
   - Support of current version of OpenSCENARIO, OpenDRIVE, OSI, FMI
   - CI, E2E test framework pyOpenPASS, documentation for V1.0
   - Functional GUI to configure, run and evaluate experiments

2. **Enhance Usability**
   - Tutorials/demos (using GUI, using configs, including FMI/OSI)

3. **Identify collaboration opportunities**
   - List links to projects on website, links to ASAM & other relevant open source projects
   - Align with Eclipse working group consolidation (openMobility, openADx etc. vs. SDV)

4. **Improvement of quality / cooperation model**
   - Increase responsiveness on issues, information on known build issues..
   - Road map for openPASS (e. g. 3 years plan – towards OpenSCENARIO 2.0)
