2. Changed APIs:.....	1
3. Added APIs:	1
4. Removed APIs:	1
5. Miscellaneous Change Requests	2

1. Introduction

Remove API setImageSource in IImageInstance.

2. Changed APIs:

None.

3. Added APIs:

None.

4. Removed APIs:

4.1 Name : IImageInstance

Component name : org.eclipse.birt.report.engine

Package name : org.eclipse.birt.report.engine.api.script.instance

Change Request:

1. Remove method:

public void setImageSource (String source);

Sets the image source type.

We now set source type automatically when user set image source, such as while user call setFile we set source type be ImageContent.IMAGE_FILE at the same time. So we needn't only set image's source type in IImageInstance.

Proposed Solution:

According resolving **bug157126**.

The source type in `ImageContent` is used in inner implement. It should not be set directly in the image instance while it will be set automatically in the `setFile`, `setURL` or `setImageName`.

5. Miscellaneous Change Requests

None.
