June 10, 2008

Contents

- Overview
  - written by the EMO

- Themes and Priorities
  - written by the Requirements Council

- Project Plans
  - written by the Projects
  - In a standard project-plan XML format
    http://wiki.eclipse.org/index.php/Development_Resources/Project_Plan

Timeline

- Project Plan tools are in place
    - 4 of 115 projects have written plans (less than 4%):
      dsdp.tm, dsdp.tml, technology.dash, technology.voicetools

- Themes & Priorities – drafting by Requirements Council
    - first meeting: July 15th

- Final frozen version – end of August 2008

- Approval – September 2008 Board meeting

- Notes:
    - Projects provide their own project plans.
    - To date, the projects have been reluctant to hostile re writing plans.
      Could be due to Ganymede, yet Ganymede is only 30 of 115 projects.
    - **The quality of the roadmap will only be as good as the quality of the plans that the projects provide.**
