

October 27th - 29th
Forum am Schlosspark, Ludwigsburg

Eclipse Summit Europe 2009, held October 27 to 29 in Ludwigsburg, was a great success, with over 400 attendees, 27 sponsors, and some new ideas that worked very well.

The OSGi Users' Forum Germany held a co-located meeting on Tuesday. For the first time, Tuesday included tutorials as well as symposia. The technical talks were divided among five content tracks on Wednesday and Thursday, with talks by sponsors integrated with the other technical content.

Microsoft sponsored both the popular library/café and the Stammtisch and demo on Wednesday evening. Besides the traditional Poster Reception on Wednesday, several research organizations using Eclipse presented posters in the special "Eclipse Meets Research" display.
