### **Mission**

The Technology PMC hosts Research, Education and Incubator projects which have particular relevance to Eclipse. Unlike other PMCs it has no overriding technical theme or objective, rather it encompasses projects covering a broad spectrum of technologies and technical areas. For the most part, projects operate independently from one another and the PMC allows individual projects a great deal of autonomy. Current projects can however be grouped into several theme areas: Aspect-Oriented Systems and Programming; Collaboration; Education; Model Driven Development; Web Tools; and Incubators.
