# PHP IDE
Creation Review

March 8, 2006

Project Goals

- Deliver a PHP Integrated Development Environment extensible framework for the Eclipse Platform

- Encompass the development components necessary to develop PHP-based Web Applications

- Leverage the existing Web Tools Project in providing developers with PHP capabilities.

Project Scope

- The project will contribute an initial set of Eclipse plug-ins that will add PHP IDE capabilities to Eclipse, and will provide APIs to further extend the functionality of the project.

- The project will be composed of a set of extensible features covering the development life cycle of PHP including functionality that deals with developing, deploying, documenting and debugging PHP-based applications

Project Architecture

Interested Parties

Support has been expressed by:

- Actuate
- IBM
- Intel
- SAP
- Zend

Community Response

- **Feedback from members of the PHPEclipse project**
  - Reviewed current design and functionality
  - Proposed new features and functionality
  - Interested in joining the community

- **Members from the community**
  - Have received requests by developers to join the PHP IDE effort.
  - Expect the community to grow quickly.

Initial Team

- **Zend**
  - Guy Harpaz (guy@zend.com)
  - Yossi Leon
  - Shachar Ben-Zeev
  - Shalom Gibly
  - Guy Gurfinkel
  - Michael Spector
  - Eden Klein
- **IBM**
  - Robert Goodman (goodmanr@us.ibm.com)
  - Brian Burns
  - Phil Berkland

Deliverable Schedule

- March 8, 2006   : Creation review

- March 20-23, 2006 : EclipseCon

- April, 2006   : Finish development stage

- May, 2006   : PHP IDE 0.7 release

- July, 2006   : Upgrade to WTP 1.5

- September, 2006   : PHP IDE 1.0 release

Future Directions

- PHP code refactoring

- PHP find usages

- Community feedback
