Project Name-change Review for the Proposed e4sl Project

Planned review date of April 22
Yves YANG
May 1st 2009

1. Background

The project e4sl is proposed as a development environment for Silverlight in eclipse. This project creation review has been declared as success April 22nd 2009.

2. Project name

There has been some concerned raised about the project name "e4sl" being too close to the "e4" project name; the two projects have no direct relationship. To avoid such confusion, we propose to change the project name to "esl".

3. Mentors

- Ed Merks (Macro Modeling)
- Wayne Beaton, Eclipse Foundation
