

New and unique results in the field of mobility simulation and modeling

S1: Autonomous Vehicles

S2: Al

S3: Other traffic modes

S4: Micro simulation / other

S5: Real-world Scenarios

S6: Real-world data

S7: Emission

OpenADx – xcelerate your Autonomous Driving development

SUMO User Conference 2020 October 26th – 28th, 2020

Andreas Riexinger | Robert Bosch GmbH Product Manager Automated Driving

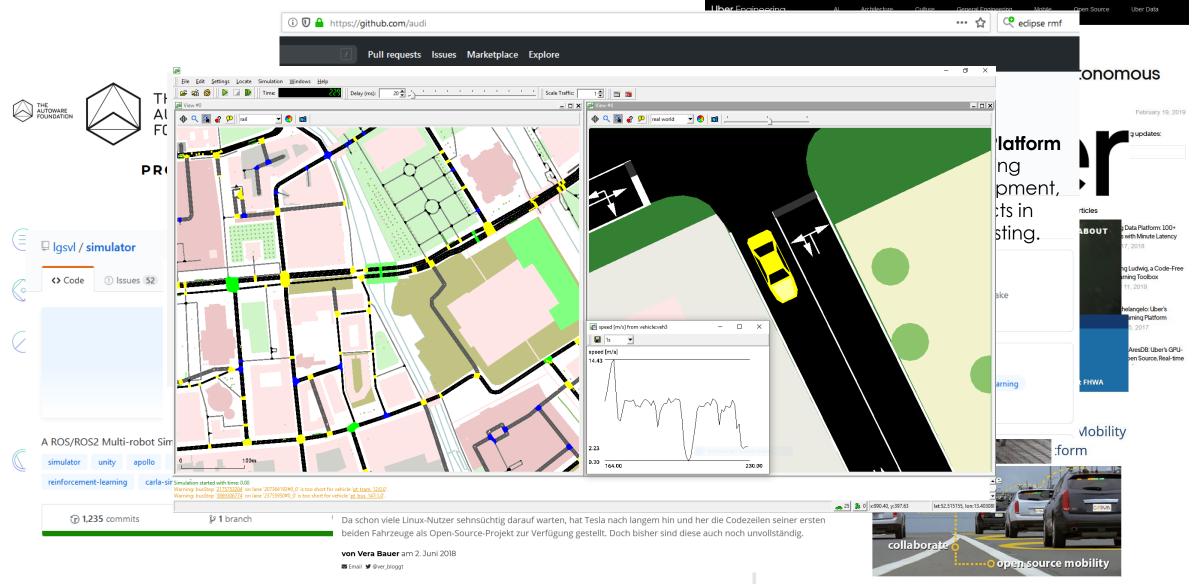

Who am 1?

Andy Riexinger
Robert Bosch GmbH
Chassis System Control – Automated Driving

- > Product Manager Automated Driving
- > ~23 years at Bosch
- > ~15 years experience in embedded software development
- > Pushing Open Source development and business within Robert Bosch GmbH
- > Interest in creating business with Open Source

Open Source has arrived in automotive

The OpenADx community provides a platform which ...

... leverages open source to increase efficiency and create standards

Reason Why

AD requires a multifaceted process incorporating a variety of software tools

But none of these tools were ever designed to work together

This costs the industry time and money

We are mitigating this problem by creating the leading automated driving ecosystem ➤ OpenADx

RB launched OpenADx at BCW 2018 ...

... and established an Eclipse hosted community

- ▶ 30 entities
- ► 60+ active contributors
- ▶ Initial projects:
 - Cloe (simulation kit for testing AD) software components)
 - Iceoryx (true-zero-copy shared memory approach)

Targets

- Accelerate time to market
- Share costs
- Free up resources to focus on customers

Approach

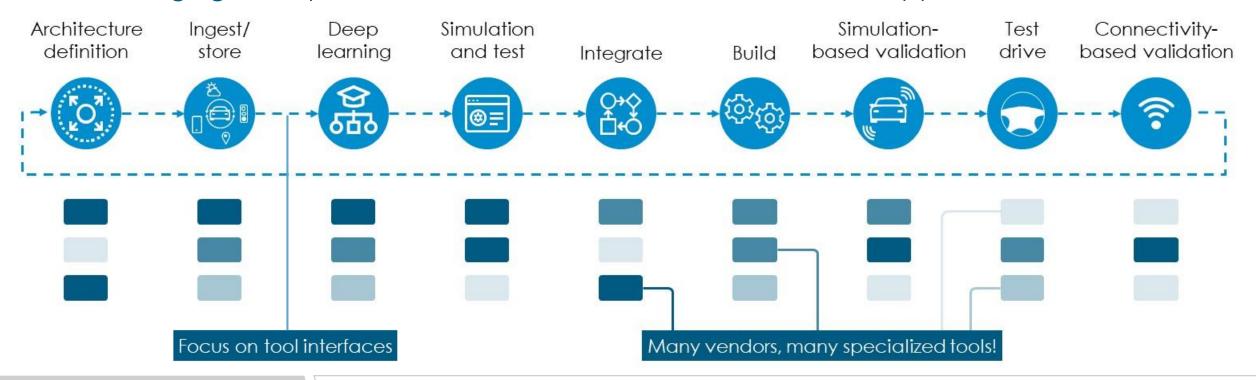

- ► Ensure high interoperability
- Provide easy access
- ▶ Establish basis for reference arch.

OpenADx targets reference architecture and ...

a wide ranging interoperable toolchain for PoV* and commercial applications

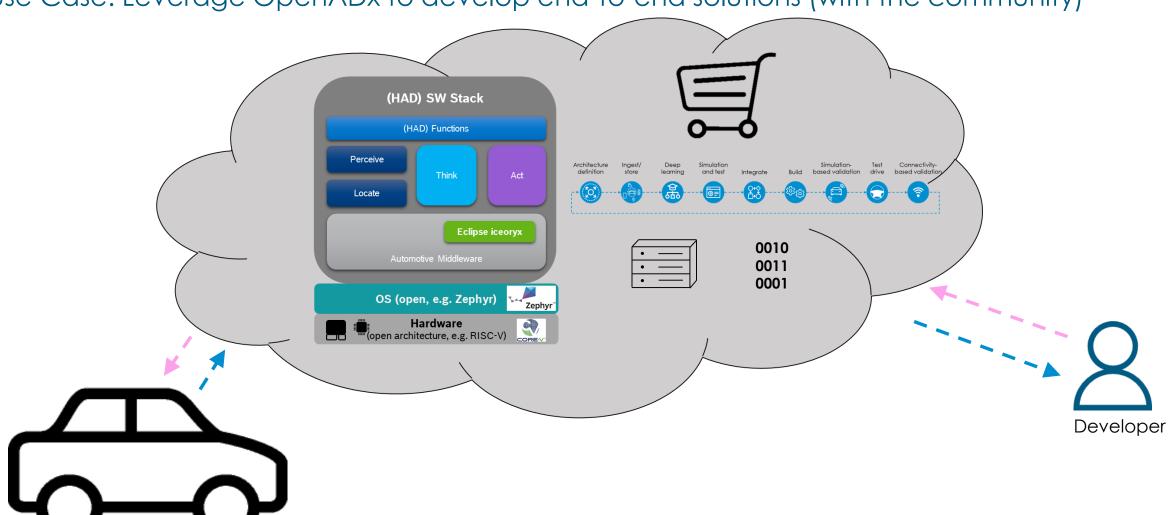

- > Industry-wide accepted definition of the AD toolchain
- > Tool interface standardization
- Ensure efficient implementation and interoperability
- > Foundation for reference architecture

Make a complex tool landscape more accessible for enterprise users

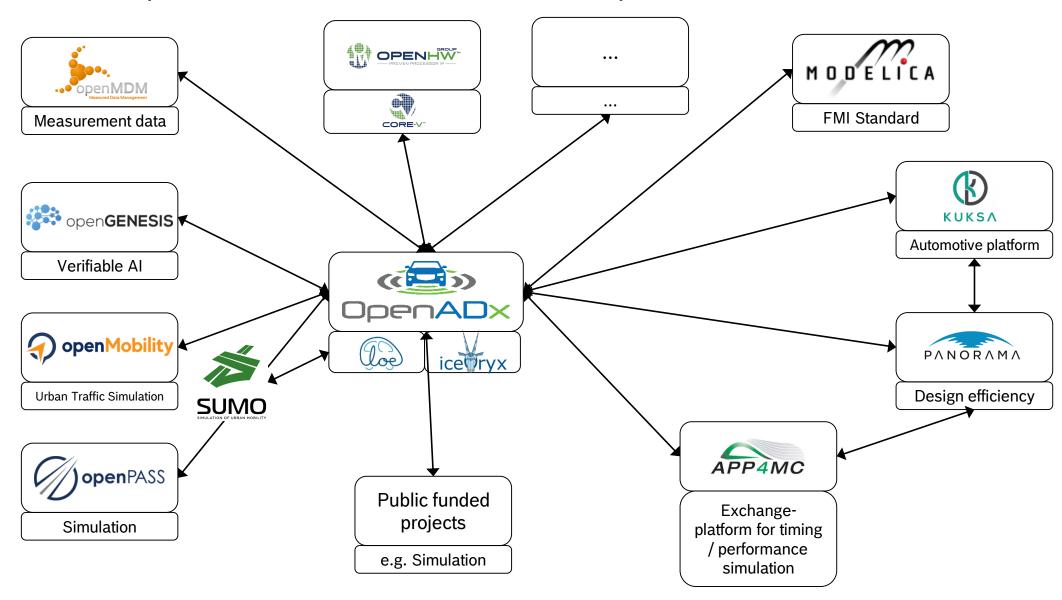

OpenADx: Leading to holistic functional approaches

Use Case: Leverage OpenADx to develop end-to-end solutions (with the community)

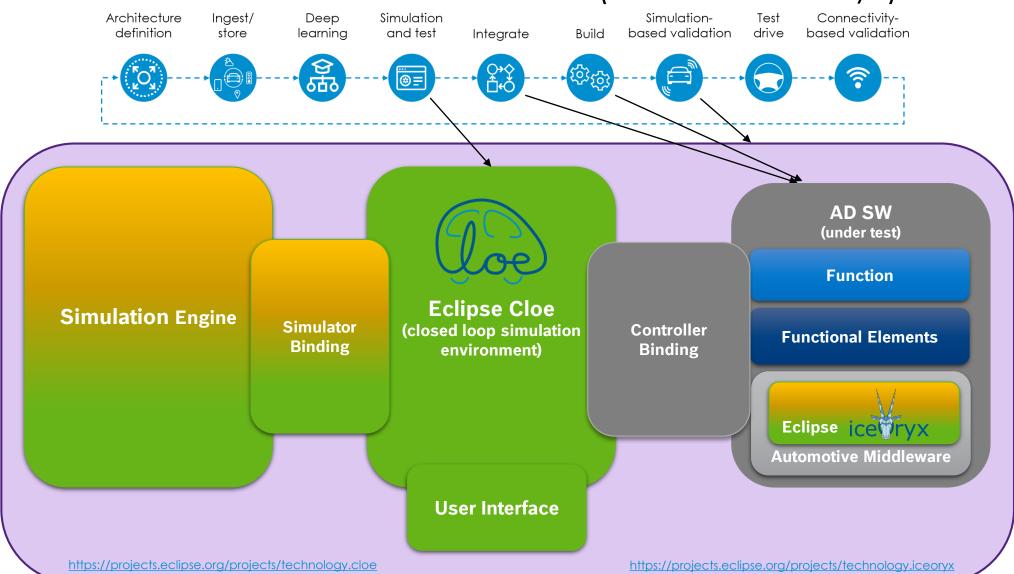

OpenADx lays the foundation for safety and standardization

OpenADx: e.g. two major initiatives to address requirements for simulation and data transfer in real time (Cloe and iceoryx)

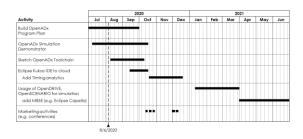

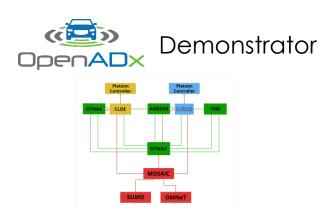

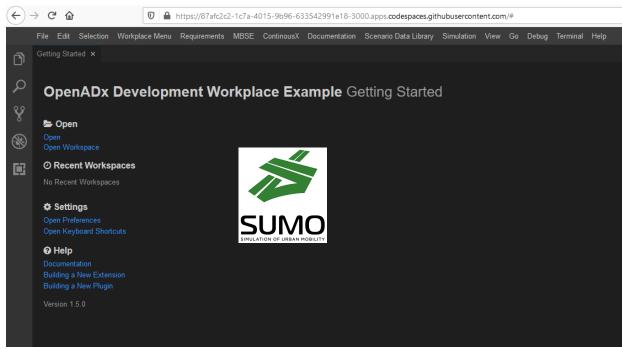

OpenADx – some projects and ideas
